Skills

- Java | Python | JavaScript | TypeScript | React | jQuery | PHP | Git | SpringBoot | Flask | SQLAlchemy | HTML | CSS | AJAX | JSON | XML
- AWS | Cloud Computing | Unit Testing | OOP | Docker | Maven | Gradle | RESTful API | SOAP | MySQL
- Frontend | Backend | Full-Stack | Prompt Engineering | English, Polish – *All professional proficiency or above*

Experience

Intern Software Engineer

LibertyIT

Galway, Ireland 01/2025 - 09/2025

- Developed and modernized core business process management (BPM) and Policy Management platforms using **Java, SpringBoot, SOAP, MySQL, React, TypeScript, Python Playwright** and **Amazon Web Services**, supporting high-impact enterprise workflows.
- **Reported directly to senior company leadership and presented** advanced BPM automation solutions, leading to team selection as company-wide technical advisors for BPM platform modernization.
- Key contributor to BPM platform re-platforming initiative - engineered **AI and prompt engineering** based automation tools that improved process efficiency by 35% and reduced manual data reconciliation by 50%.
- Enhanced platforms security and compliance by integrating **cybersecurity** best practices and advanced **threat modeling**, strengthening overall enterprise risk posture.
- Authored comprehensive **Amazon Web Services** technical documentation and delivered platform demonstrations to guide executive decision-making on process automation strategy.
- Designed and engineered a complex **AI prompt** tailored towards verification of migrated programs against its existing legacy behaviours.

Various Positions

Hospitality, Retail,
Medical Manufacture

Poland and Ireland

2015 - 2025

- Worked in various leadership and management positions in different customer service and manufacturing settings, while building strong communication, teamwork, adaptability and attention to detail.

Education

Bachelor Honours of Science

Technological University Of
The Shannon

Athlone, Ireland 09/2022 - 10/2026

- Software Design with Artificial Intelligence for Cloud Computing - First Class Honours (Stage 3 GPA 80.66%)

Projects

- **PRODUCT QUALITY PREDICTION APPLICATION:** Designed, developed, trained and tested **machine learning** model (Python, scikit-learn, Flask, JavaScript, HTML, CSS, Google Cloud) for the purpose of producers predicting the quality of their products, based on chemical and physical factors. **(10/2024)**
- **NEWSAGENT FULL STACK APPLICATION:** Creator of management system for the newsagent business daily operations (Java, JUnit, React, MySQL, JDBC, GIT, Agile SDLC). **(12/2024)**
- **MVC INVENTORY SYSTEM:** implemented inventory system for the grocery shop using Model View Controller design pattern and utilising concepts such as Serialization, RMI and GUI. (Java EE). **(12/2024)**
- **MUSIC SHOP OPERATION SYSTEM:** crafted and delivered operational full stack system for the music shop. (Bootstrap, JQuery, AJAX, PHP Slim Framework, MySQL). **(12/2024)**
- **LICENSE MANAGEMENT SYSTEM:** engineering owner of management system for various access licenses. (Java, SpringBoot, JPA, REST API, Postman). **(04/2024)**
